

Technical Clubs & Events

GAT's technical clubs provide a hands-on platform for students to explore emerging technologies and industry-relevant skills. Coding Club (GCC) focus on programming, software development, data structures, artificial intelligence, and competitive coding. Students actively participate in hackathons and innovation challenges, including IBM Datathon, VTU Interact 2025, and IIT Bombay Techfest, gaining exposure to real-world problem-solving and teamwork.

Specialized technical initiatives in Drone Technology, Space Science, Robotics, IoT, and Automation offer workshops, demonstrations, and project-based learning supported by industry experts and academic mentors. These activities are further strengthened through academic platforms such as the Academic Conclave and Corporate Conclave, which connect students with researchers, industry leaders, and corporate professionals.

Non-Technical Clubs

Non-technical clubs nurture creativity, communication, and leadership skills. Literary, cultural, photography, and entrepreneurship clubs provide opportunities for students to express ideas, manage events, and develop confidence. These clubs play a vital role in shaping socially aware, adaptable, and well-rounded graduates.

Cultural, Sports, NCC & NSS: Holistic Student Development

At Global Academy of Technology, holistic development is a core institutional value, reflected through rich cultural, sports, and social responsibility initiatives. The campus provides a dynamic platform

Specialized technical initiatives in Drone Technology, Space Science, Robotics, IoT, and Automation offer workshops, demonstrations, and project-based learning supported by industry experts and academic mentors.

for students to express talent, build leadership, and cultivate discipline and social awareness.

Cultural activities celebrate diversity, creativity, and student expression through music, dance, drama, fashion shows, and literary events. Annual cultural fests and intercollegiate competitions encourage participation, teamwork, and confidence-building while fostering a strong sense of community.

The institute promotes physical fitness and sportsmanship through well-structured sports programs that include indoor and outdoor games such as cricket, football, volleyball, badminton, athletics, and chess. Students regularly represent GAT in VTU and intercollegiate tournaments, earning accolades and recognition.

The National Cadet Corps (NCC) unit instills discipline, leadership, patriotism, and resilience among students through structured training, camps, and national-level activities. Complementing this, the National Service Scheme (NSS) engages students in community outreach programs, blood donation camps, cleanliness drives, rural development initiatives, and awareness campaigns. Together, cultural, sports, NCC, and NSS activities shape socially responsible, confident, and well-rounded graduates prepared to contribute meaningfully to society.

Sports Achievements

Every year, around 30 students represent GAT in All India Inter-University competitions, national-level events, Khelo India championships, and VTU sports and cultural meets. GAT has secured the First Rank in VTU Sports and Cultural Activities, which is a proud achievement. More than 300 students participate in state-level sports tournaments each year, showing a strong sports culture on campus.

NCC Cadets have represented GAT at national camps such as the Republic Day Camp, Thal Sainik Camp, Indian Military Academy attachment camps, and leadership camps. Two cadets have been selected for the Republic Day Camp 2026 in New Delhi, which is a proud moment for the institution.

Community Engagement

GAT connects with school students through chess and football competitions and the GAT Quiz held in honour of Dr. A. P. J. Abdul Kalam. These initiatives show our dedication to community outreach and shaping young minds with strong values.

Placements & Career Development

Global Academy of Technology has built a robust and outcome-driven placement ecosystem that reflects its strong academic foundation and industry alignment. With a global alumni network of 60,000+ professionals, GAT graduates are making meaningful contributions across industries, enterprises, and research institutions worldwide.
