STYLE & PURPOSE

The VinFast VF 6 is the crossover electric that not just looks like it belongs on a poster, but has a passenger centric cabin underlined by a very capable powertrain

ROUND TRIP		ONE WAY	
JAIPUR	270KM	KANPUR	460KM
AGRA	210KM	BIKANER	450KM
HARIDWAR	224KM	AMRITSAR	470KM
DEHRADUN	270KM	MUSSOORIE	300KM
CHANDIGARH	260KM	JHANSI	450KM

The latest automaker to enter the Indian market, VinFast has been on a roll, having commenced customer deliveries of its VF 6 and VF 7 electric cars. The smaller of these, VF 6 is truly a unique proposition for customers, it follows a sporty yet sleek silhouette, giving it a crossover look, something that is unique in India's boxy SUV dominated space. It measures 4,241mm in length, 1,834mm in width, 1,615mm in height and has a wheelbase of 2,730mm. The design has been developed by Italian firm Torino Design, and the cohesiveness is very apparent. The front is low-set, adding sportiness, while being aerodynamic, enabling the VF 6 to be efficient at highway speeds. What makes the VF 6 stand out is its unique lighting signature, in the shape of a converging V, instantly making it a style statement for the VinFast brand. Inside, the VF 6 is another unique experience, headlined by an absolutely minimalist cabin. Taking centre stage is the 12.89-inch infotainment display that has been tilted towards the driver, because it serves not only as the entertainment hub for the car, but also the control centre for most functions including the climate control, and other vital settings. The VF 6 does not have a conventional drive selector, instead it has neatly laid out switches below the infotainment display.

In fact, the space and the looks aren't the VF 6's strongest suits, it is its powertrain. The 204bhp e-motor provides the VF 6 with more than ample power, taking just 8.9 seconds to sprint from nought to 100kmph. And it isn't outright pace, it is the efficiency of the motor, that coupled with the 59.6kWh battery pack gives it a claimed range of more than 460km on a single charge.

This means that one can drive VF 6 to other cities like Agra, Jaipur, Haridwar, Dehradun and Chandigarh and back to Delhi without the need to charge up the car. One can even drive to Amritsar, Kanpur, Bikaner, Haridwar and Mussoorie in a single charge, underlining the VF 6's capability in the Indian ecosystem, that is constantly evolving.
