

HARYANA'S GREEN REVOLUTION 2.0

A BEACON OF AGRICULTURAL PROGRESS EMPOWERS FARMERS AND SUSTAINS FUTURES

Organic farming, digital tools, and dairy incentives join hands to sow opportunities for every farmer

In the heartland of India, where fertile soil meets tireless hands, Haryana stands as a beacon of agricultural progress. In recent years, the state has experienced a remarkable transformation in how it supports, nurtures, and empowers its farmers. From adopting natural farming to revolutionising procurement systems and modernising sugar mills, Haryana's agricultural journey is truly inspiring. It makes a story of innovation, resilience, and a forward-looking vision.

Guided by its commitment to sustainable and inclusive growth, the Haryana Government has placed natural farming at the centre of its agricultural reforms. This approach not only reduces dependence on chemical inputs but also rejuvenates the soil and the ecosystem.

Recognising its importance, the state has organised extensive training programmes for government employees and local leaders. In some districts, including Hisar and Jind, village heads (Sarpanches) participated in one-day online training sessions designed to create awareness about the natural farming techniques.

The response from farmers has been enthusiastic. This year, more than 1.84 lakh farmers have so far expressed interest in natural farming, registering over 2.73 lakh acres of land on the state's dedicated portal. Verification has already been completed for 19,723 farmers across 31,873 acres, ensuring that they receive the support needed to make a smooth transition.

The support is not merely theoretical. The government has provided ₹75 lakh to 2,500 farmers for the purchase of essential farming tools such as drums, and an additional ₹1.30 crore to assist farmers in buying indigenous cows. The funds were transferred directly into their bank accounts.

In the 2025–26 Budget, the scope of the programme was expanded further, increasing the natural farming area target from 25,000 acres to 1 lakh acres. Moreover, the subsidy for purchasing indigenous
