Haryana has redefined what agricultural policy can achieve – from transforming procurement and promoting natural farming to digitising crop data and modernising sugar mills. The result: empowered farmers and a resilient rural economy

cows has been raised from ₹25,000 to ₹30,000 per farmer, ensuring stronger incentives for sustainable practices.

With a view to building capacity, natural farming training centres have been established in Kurukshetra, Karnal, Jind, and Mewat. These centres serve as hubs of knowledge for officials and progressive farmers, creating a ripple effect throughout the farming community.

ENCOURAGING RESPONSE TO MERI FASAL MERA BYORA

Alongside these green initiatives, the state has also prioritised digital transformation. The launch of the Meri Fasal Mera Byora portal in July 2019 marked a turning point in making farming a data-driven proposition. This platform enables farmers to register their crops for government procurement and other schemes. Since its inception, millions of acres have been registered season after season, reflecting the platform's growing popularity.

In Kharif 2023, 9.28 lakh farmers registered 63.60 lakh acres of land. This number increased in Rabi 2024–25 to 9.72 lakh farmers covering 65.56 lakh acres. By Kharif 2025, even before the season closed, over 12.80 lakh farmers had registered 73.48 lakh acres. More than mere statistics, these figures represent the dawn of a new era of transparency, accessibility, and farmer empowerment.

₹1,345-CRORE BONUS TO FARMERS

In order to further support farmers, the state disbursed a bonus of ₹2,000 per acre during Kharif 2024.

On this account, ₹1,345 crore was directly transferred to farmers' accounts. When climate change affected harvests due to low rainfall and intense heat, the government lent support by providing ₹1,270.97 crore as compensation to 13.18 lakh farmers.

Procurement at Minimum Support Price (MSP) remains a strong pillar of Haryana's agricultural policy. The state ensures that all the 24 notified crops, including paddy, bajra, moong, maize, wheat, mustard, cotton, sunflower, and pulses, are procured at MSP rates. A notification issued in December 2024 guaranteed payment within 48 hours of procurement. During the 2024–25 marketing season, the government paid a record ₹38,107.87 crore to farmers.

MSP rates have recorded significant increases: wheat rose from ₹2,425 to ₹2,585 per quintal, barley from ₹1,980 to ₹2,150, mustard from ₹5,950 to ₹6,200, and lentil from ₹6,700 to ₹7,000. Looking ahead to 2025–26, further increases have been announced. Bajra MSP has been increased to ₹2,775; maize to ₹2,400; tur (arhar) to ₹8,000; and cotton to ₹8,110. These adjustments reflect the government's firm resolve to protect farmers from market fluctuations.

COOPERATIVE MILLS PURCHASE 303.81 LAKH QUINTALS OF SUGARCANE

No agricultural story in Haryana is complete without mentioning sugarcane—the lifeline of many in the farming community. In the 2024–25 crushing season, 537.73 lakh quintals of sugarcane was processed by 14 sugar mills, producing 51.86 lakh quintals of sugar with an average recovery rate of 9.30%.

The state-advised price (SAP) was increased to ₹415 per quintal for early varieties, while mid and late varieties were fixed at ₹408 per quintal, ensuring fair compensation. Cooperative sugar mills played a vital role, collectively purchasing 557.73 lakh quintals of cane worth
