HERE, AVIATION DREAMS TAKE FLIGHT

Integrated aviation hub, new flight routes and cargo infrastructure write a bold new chapter in Haryana's connectivity book

Haryana is making rapid strides in civil aviation, with major infrastructure upgrades and connectivity initiatives. Under the Union Government's Regional Connectivity Scheme (RCS), Hisar airport is being developed as an integrated aviation hub, enabling all-weather operations of large aircraft.

HISAR: INTEGRATED AVIATION HUB

Spread over 7,200 acres (4,200 acres for airport, 3,000 acres for an aeronautical cluster). Hisar is central to Haryana's civil aviation vision. Phase 1, including a new terminal building, was completed at an investment of ₹50 crore. In Phase 2, a 3,000-meter runway capable of handling Airbus-class aircraft (180 seats) was approved by the Union Ministry of Civil Aviation in March 2025.

An MoU with Alliance Air was signed on June 13, 2024, to launch flights from Hisar to Ayodhya, Jaipur, Chandigarh, and Delhi. Services to Ayodhya, Chandigarh and Jaipur have started; others will follow soon. The Hisar– Ayodhya flight was flagged off by the Prime Minister on April 14, 2025.

INFRASTRUCTURE AND OPERATIONAL UPGRADES

The ongoing projects include a new hangar, cargo handling facilities, and an AAI cargo terminal. A ₹487-crore Air Traffic Control (ATC) tower is planned, with ₹264 crore allocated to AAI. A heliport in Gurugram is also planned: 18 acres of land has been acquired and feasibility studies have been completed. Helicopter taxi services are proposed for Sirsa, Khatushyamji, Pitambari Mata, and Chandigarh, with discussions ongoing with Rajasthan and other stakeholders.

AMBALA, KARNAL AND PINJORE GET A BOOST

At Ambala airport, all major works are complete and an agreement has been signed between AAI and the state government. Flight operations are being planned with Alliance Air. At Karnal, land acquisition has been done and feasibility studies are underway. The Pinjore heliport is being upgraded with a terminal and an ATC tower. Haryana's integrated aviation strategy promises to boost connectivity, employment, and regional growth, placing the state firmly on India's aviation map.

FLYING HIGH

INTEGRATED AVIATION HUB, HISAR
- 7,200 acres under development
- Airbus-capable 3,000-metre runway completed

PHASE 1 COMPLETED
- Terminal building completed
- ₹50 crore invested

Flight routes launched
- Flights commenced to Ayodhya, Delhi, Jaipur and Chandigarh (Sep 2025)
- Upcoming routes: Ahmedabad, Jammu

MoU WITH ALLIANCE AIR
- For flight operations on five key routes

NEW AIR TRAFFIC CONTROL TOWER
- ₹487 crore ATC tower project approved

HANGAR AND CARGO FACILITIES
- New hangar planned
- Cargo apron and terminal under development
- Helicopter taxi services
- Planned for Hisar, Chandigarh, and nearby cities

AMBALA AIRPORT UPGRADES
- Major works completed
- MoUs signed for further flight operations

KARNAL HELIPORT
- 16 acres acquired for heliport development
- Feasibility study completed
