Award 2023 for transparency and accessibility.

Haryana's green-campus and digital-innovation initiatives were recognised at the CII National Awards 2023 and ISGF 2024, reinforcing its leadership in sustainable education management.

NEP-2020 IMPLEMENTATION AHEAD OF SCHEDULE

Having a network of 14,294 government NEP-2020 by 2025–26—five years ahead of the national deadline. It was the first state to introduce structured early childhood education through Bal Vatika-III in every government primary school, ensuring foundational literacy and numeracy (FLN) from the start. The FLN programme has now been extended up to Class 5.

Through E-Adhigam, 5 lakh students in Classes 10–12 and their teachers have received Samsung tablets preloaded with adaptive learning software, NCERT content, and internet data. Managed via the Avsar Portal, the initiative digitally tracks Student Health Cards, SAT scores, and report cards.

During the pandemic, 52 lakh students continued learning through Doordarshan, JioTV, and EduSat channels, ensuring that education never stops.

CAREER GUIDANCE AND SKILL-BASED LEARNING

The Umeed Career Portal offers counselling and entrance guidance for Classes 9–12. Skill-based education has been introduced in 1,255 government schools, benefiting 1.19 lakh students with hands-on exposure to trades and technologies.

Sports promotion has also been strengthened, with daily allowance for student-athletes increased to ₹200 at the state level, and to ₹250 at the national level.

FULL MARKS

- GER: 34.8% (2022-23), aiming for 50%+ by 2030

- 6.15 crore+ e-resources available on a unified platform
- 2,171 new assistant professors appointed
- Free tuition for all girls and low-income students
- Soil testing labs to link science & agriculture
- Kurukshetra University ranked top in India (government category)

INDUSTRY LINKAGES AND TECHNICAL EDUCATION

Haryana's technical education has become a model for employability, achieving 74% placement rate across government, aided, and society-run polytechnics. Over 580 MoUs have been signed with industries to promote internships and placements.

Since 2014–15, 15 new polytechnics have been set up, increasing the student intake by 4,560 seats to 15,210. Centres of Excellence in four polytechnics focus on emerging technologies. The state also hosts premier institutes such as NIFT Panchkula, IIM Rohtak, NIELIT Kurukshetra and Umri, and IIT Delhi's Sonipat Extension Centre. In a first in India, at Government Polytechnic Panchkula, the Maharshi Rishi Ashtavakra Centre provides specialised training for hearing and speech-impaired students. Dedicated computer labs for SC students are being developed at Sadhaura and Umri, along with new hostel facilities.

The ₹50-crore ATAL (Advanced Training and Learning) Lab at Murthal has positioned Haryana as the first state in north India with such a high-end innovation facility. In 2021–22, the state began offering B.Tech programmes in Hindi, with bilingual diploma courses for rural students. Under the RUSA scheme, Guru Jambheshwar University, Hisar, received ₹50 crore for infrastructure improvement, while 295 students benefited from the AICTE Pragati Scholarship, each receiving ₹50,000.

FOSTERING SCIENCE, EDUCATION, AND EMERGING TECH

Haryana encourages scientific excellence through its Haryana Science Ratna Awards, honouring both senior and young scientists annually. The state also supports students with scholarships from elementary to doctoral levels, and rewards winners of national and international science Olympiads with generous cash prizes.

In advanced tech, Haryana has established a Blockchain Centre of Excellence (APIARY CoE) in collaboration with MEITY and STPI, offering support to Blockchain start-ups and innovators.
