

- **Affordable Housing Drive**
  22,086 flats completed (2014-2025); **19,940 for BPL** families, **2,146** for other groups.
  ₹733 crore spent on construction.
- **Credit-Linked Subsidy Scheme (CLSS)**
  In March 2022, online services for the Mukhyamantri Rehabilitation Fund were launched to provide easy loan access to financially distressed citizens

Haryana is rewriting its housing story into one where homes are not just structures, but instruments of dignity and change. From smart cities to village plots, the state is building futures

₹733 crore. While construction of 1,941 more houses is underway, 4,276 have already been handed over.

FROM SMART TO SWACHH CITIES

Haryana's urban transformation is driven by inclusive governance, smart planning, and people-first policies. With 87 urban local bodies — including 11 municipal corporations, 24 councils, and 52 municipalities — the state has established a strong framework to ensure sustainable urban growth.

To ensure inclusive participation, 8% of seats in urban bodies are reserved for Backward Class (A) and 5% for Backward Class (B). Honorariums and allowances for elected representatives have been increased. Mayors and chairpersons are now paid meeting allowances ranging from ₹1,600 to ₹3,000, while ward committee chairpersons are empowered to convene meetings and get ₹1,000 per sitting. Members are also covered under Ayushman Bharat–Chirayu Yojana.

In 2025–26, the government allocated ₹5,666 crore for civic projects under CFC, SFC, and other schemes—up from ₹1,693 crore in 2014–15. Already, ₹2,544 crore has been released to urban bodies.

In order to uplift urban poor families, the National Urban Livelihoods Mission (NULM) is operational across all cities, offering self-employment loans up to ₹2 lakh to individuals; and ₹10 lakh to groups, with extra grants for women's self-help groups. So far, 8,093 individuals and 1172 groups have been assisted. Also, 9,748 SHGs and 68 regional federations have been formed.

SMART CITIES AND SANITATION

Urban development also focuses on liveability. Under the Smart City Mission

- Faridabad has approved 45 projects worth ₹930 crore
- Karnal is implementing 122 projects worth ₹926 crore
- The Swachh Bharat Mission has delivered 66,662 individual toilets, 2,319 community toilets, 6,871 public conveniences
- Haryana became Open Defecation Free in October 2017.

SOLID WASTE MANAGEMENT AND CLEAN CITY RANKINGS

Solid waste management is now streamlined through 11 waste management clusters with door-to-door collection, segregation, and scientific disposal. The Swachh Haryana Citizen App enables real-time monitoring of waste collection, street cleaning, and sanitation efforts.

These initiatives are gaining national recognition. In Swachh Survekshan 2023, Haryana ranked 14th among states with fewer than 100 urban bodies.

- Rohtak and Gohana were declared the cleanest cities in the state
- Sonepat Municipal Corporation received a One-Star Garbage-Free City rating
- Gurugram and Rohtak previously achieved Three-Star ratings for top-tier cleanliness standards

From affordable housing and empowered local governance to smart cities and sustainable sanitation, Haryana's urban and housing reforms are making the state a model for its peers to follow. It's a story of inclusion, growth, and community pride, where every home and clean street is a step towards a stronger, more equitable future.

Haryana is rewriting its housing story—one where homes are not just structures, but instruments of dignity and change. From smart cities to village plots, the state is building futures
