MAXIMUM OUTREACH, TANGIBLE RESULTS

Between November 2016 and July 2025, 4,97,254 Saksham Yuva applications were approved. The state disbursed ₹3,220.79 crore ₹2,260.24 crore in unemployment allowance and ₹960.55 crore as honorarium. The scheme has helped 14,489 youth secure jobs and 18,514 receive skill training. Its structure — linking benefits to productivity — turns unemployment into an opportunity.

Additionally, 32,361 beneficiaries outside the scheme received ₹226 crore in unemployment allowance between October 2014 and Sep 2025, reflecting Haryana's inclusive approach.

CAREER GUIDANCE AND EMPLOYABILITY

Conscious of the fact that employment requires readiness, the Haryana's Employment Department launched a state-wide Career Counselling and Vocational Guidance Programme.

Between October 2014 and Sep 2025, 13,305 sessions were held, reaching nearly 5,11,635 youth. These sessions covered aptitude testing, CV writing, interview preparation, and career awareness, bridging the gap between academic learning and market needs.

REGULAR JOB FAIRS ACROSS THE STATE

The state has institutionalised Rozgar Melas (employment fairs), targeting at least two placement drives in each district every month. These connect job-seekers directly with employers, reducing the mismatch in the labour market.

Between October 2014 and Sep 30, 2025, Haryana held 2,873 such fairs, resulting in 1,15,014 youth placements in sectors like IT, manufacturing, logistics, textiles, and renewable energy.

SKILL DEVELOPMENT AND INDUSTRY ALIGNMENT

In order to align education with local economic demands, Haryana partners with industries, training institutes, and technical bodies to offer short-term, job-oriented training modules. Many courses include on-the-job training and placement support, easing the transition from learning to employment.

TRANSPARENT AND MERIT- BASED RECRUITMENT

The Haryana Staff Selection Commission (HSSC) and Haryana Public Service Commission (HPSC) have modernised recruitment.

Over 1.80 lakh youth have been appointed to government posts purely on merit. The HSSC eliminated interviews for Group C and D posts, basing selection entirely on written exams. The introduction of the Common Eligibility Test (CET) allows candidates to qualify once for multiple recruitments, streamlining the process.

The CET 2022 saw 11.36 lakh candidates, and 13.48 lakh appeared for the July 2025 exam — both conducted fairly and efficiently. The HPSC complemented this with 10,201 merit-based appointments. A new recruitment calendar ensures predictability and efficiency in hiring.

In a noteworthy move, Haryana extended its ₹1 crore ex-gratia policy—previously only for families of martyred soldiers—to agniveer who die in the line of duty, reflecting its inclusive and compassionate governance model.

Over the past decade, Haryana has evolved from offering welfare to building a future-ready workforce. With digital governance, transparent recruitment, inclusive schemes, and skill-based empowerment, it is steadily realising the vision of "Rozgar for All" — one job, one skill, one empowered citizen at a time.

Haryana has quietly scripted a transformation story rooted in empowerment, efficiency, and inclusion. Backed by transparent recruitment reforms, its employment ecosystem now stands as a benchmark
