

POLICING GOES HI-TECH BUT WITH A HUMAN TOUCH

From AI-enabled emergency response systems to pioneering forensic set-up, from women's safety initiatives to cybercrime crackdowns, Haryana is setting new standards in technology-driven governance and public safety

With focus on innovation, transparency, and citizen-first strategies, Haryana Police are redefining public safety.

UNIFIED EMERGENCY RESPONSE SYSTEM

At the core of this transformation is Haryana 112, a unified emergency platform integrating police, fire, and ambulance services. Soon to be AI-powered, the system is expected to significantly improve life-saving response time. The Emergency Response Support System (ERSS), backed by over 10 helplines, including cyber and traffic, is managed by 182 dispatchers.

Equipped with 630 Toyota Innova vehicles, the system has responded to over 2.65 crore calls, reducing average response time from 16 minutes in 2021 to 10 minutes in 2025.

cyber police stations

700
trained personnel

₹543.48
crore blocked or recovered from cyber frauds (2023-2025 Octber)

Citizens can now also contact 112 via WhatsApp, sharing real-time media and locations — a move credited with saving lives.

SPECIALISED POLICING AND FORENSICS

Haryana's fight against organised crime and drug trafficking has intensified with the formation of the State Enforcement Bureau (2023) and the Narcotics Control Bureau (2020). These units have strengthened and expedited investigations and inter-agency collaboration.

In a major technological leap, the Madhuban Forensic Science Laboratory has introduced India's first barcode-based evidence tracking system, earning Haryana top national forensic ranking in 2022.

WOMEN'S SAFETY AND COMMUNITY OUTREACH

Gender-sensitive policing remains a priority. A Women Police Training Centre in Hisar, integration of helpline 1091 with 112, and the Trip Monitoring service (launched in December 2023) allow women to have their
