All a child needs is a chance. Give that chance, and they will surprise you, Mr Vasal adds while explaining the group's 'Every Child, Every Chance, Everyday' programme.

SANJEEV KUMAR VASAL

Mental health is also taken seriously at Vasal Education's schools. Through a collaboration with Fortis National Mental Health Program under the aegis of Dr Samir, psychologists, therapists, and emotional wellness coaches regularly engage with students. Students and parents attend regular counselling sessions, while workshops on art therapy, social etiquette and stress management equip them with lifelong coping skills.
An unusual but beautiful addition to the curriculum is the presence of mini farms on school grounds, where students plant and harvest crops like rice, wheat and sugarcane. Watching a seed grow teaches patience, responsibility and the joy of slow progress.

At Vasal Education, teachers, too, are treated with exceptional care. Recruitment is merit-first, training is continuous, and lunch is provided every day to the staff, a small gesture with a big message. "If teachers feel valued, they can make children feel valued," Mr Vasal notes.

Looking ahead, the schools are preparing children for a world that will demand creativity and technological fluency. 3D printing labs are being introduced to students - a futuristic step even by global standards. Music education has received a major boost through national-level collaborations, ensuring that every child has access to an instrument. Preschoolers in Ludhiana even get baby pianos, the first such initiative in India. All K-12 schools even have dedicated guitar, drum, keyboard and vocal studios.

For students aspiring to study abroad, the school provides a direct global pathway through its prestigious partnership with Colleges Abroad, offering internationally transferable academic credits. Each year, students also gain the opportunity to attend exclusive summer programmes at institutions such as Alma College and the University of Detroit Mercy.

Initiatives That Set Vasal Education Apart

The VE Forest project: An initiative that brought more than 2,000 students and community members together to plant 2,000 saplings in a single minute. This micro-forest was grown in partnership with the Department of Forest and Wildlife Preservation, Government of Punjab.

Visits by Professors from Abroad:
Every quarter, professors from the United States visit Vasal Education schools to conduct sessions on entrepreneurship to character building, neuropsychology and leadership. Each session adds confidence and a global outlook to classrooms.

VE Talks: Under VE talks, students get a chance to interact with the leaders from the armed forces, technology, sports, media and public service.

VE Honour: An effort to celebrate the dedication of Vasal Education's staff. This year the platform even included the mentors who once shaped Chairman Sanjeev Kumar Vasal in his formative years.

As Mr Vasal often reminds his team, the mission is clear: to bring high-quality education to Tier II and Tier III cities and ensure that every child is prepared to compete on a global stage with confidence.

Vasal Education
Transforming Futures

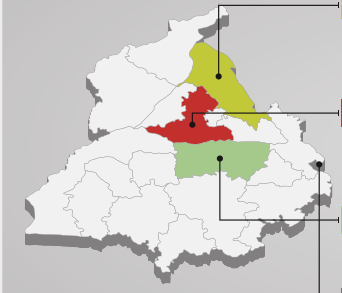

- **Five schools across Punjab.**
- **Over ₹1 crore in scholarships every year.**
- **Fee waivers for defence families.**
- **Mental Health Program with Fortis Hospital.**
- **• Global pathways with Access USA.**
- **• VE Honour: An effort to celebrate the dedication of Vasal Education's Staff.**
