CAPTAIN COOL

and Orient Electric reveal the only thing that gets "Fatt Se Garam" this Winter

Orient Electric Limited [BSE: 541301, NSE: ORIENTELEC], part of the diversified USD 3 billion CKA Birla Group, has relaunched its winter campaign, "Fatt Se Garam," led by a digital film featuring Brand Ambassador MS Dhoni. Addressing the needs of today's consumers who are accustomed to the speed of quick commerce, the campaign reinforces the brand's promise of faster heating powered by Whirlflow Technology, which delivers superior performance with 20% more hot water output for instant winter warmth.

The campaign uses engaging storytelling to demonstrate the range's superior benefits backed by robust product innovation. Apart from Whirlflow technology enabling faster heating, the products also offers superior durability, featuring Duron Tech, which offers advanced corrosion resistance against hard water conditions and a best-in-class 6 year warranty on the tank. By combining these durability features for comprehensive protection, Orient Electric ensures that the promise of fast hot water comes with total peace of mind.

Commenting on the campaign, Anika Agarwal, Chief Marketing and Customer Experience Officer, Orient Electric, said, "'The 'Fatt Se Garam' campaign is about redefining the everyday experience of warmth for the modern home, especially in the winter season. We recognise that for today's consumers, time is the ultimate luxury, and hitting the pause button isn't an option. Our focus is on creating intuitive solutions that eliminate the 'wait' from daily routines, offering the confidence and reliability needed to keep moving. It's about delivering comfort that matches the rhythm of their lives instantly and effortlessly."

JK PAPER STRENGTHENS SUSTAINABLE PACKAGING LEADERSHIP

WITH LAUNCH OF JK AQUA RANGE AMID RAPID MARKET GROWTH

JK Paper Ltd., a leader in sustainable paper and packaging solutions, today announced the launch of its JK Aqua Range, a comprehensive portfolio of aqueous coated paperboard products designed to replace conventional plastic-based packaging. The launch comes at a time when the global sustainable packaging market is witnessing robust growth and heightened demand for recyclable alternatives.

According to industry estimates, the global sustainable packaging market is expected to grow at a CAGR of over 6.5% between 2024 and 2030, with the demand for recyclable, compostable, and plastic-free materials increasing sharply year-on-year. In India, the sustainable packaging sector is projected to grow at a double-digit pace, driven by stricter regulatory mandates on single-use plastics, rising consumer preference for eco-friendly products, and brand commitments to environmental responsibility.

In response to these trends, JK Paper has developed the JK Aqua Range, featuring six purpose-specific variants:

- JK Aqua Bev – for beverage cups and liquid containers
- JK Aqua Tub – for dairy and ready-to-eat food tubs
- JK Aqua Freeze – engineered for frozen and chilled foods
- JK Aqua Bowl – ideal for hot and cold food bowls
- JK Aqua Pack – a versatile solution for varied food packaging formats
- JK Aqua Serve – for plates, trays, and serving containers

Central to the range is aqueous coating technology, which replaces conventional plastic or polyethylene coatings with water-based barriers that are fully recyclable, repulpable and compliant with food safety standards. By eliminating plastic barriers, the JK Aqua Range enables a reduction of up to 95% in plastic usage compared to traditional coated boards, supporting both brand sustainability goals and circular economy principles.

A senior executive at JK Paper commented, "With global consumers increasingly demanding sustainable choices, we are proud to introduce the JK Aqua Range. This portfolio not only responds to market demand but also reinforces our purpose of Enriching Lives—

by enabling our customers and partners to adopt solutions that are better for business and better for the planet."

The launch of the JK Aqua Range positions JK Paper to capitalize on the growing sustainable packaging opportunity, reinforcing its leadership in plastic-free coated boards and supporting India's transition toward responsible, environmentally aligned packaging solutions.
