The Modern Silk Route for E-Commerce: How Assiduus Global Is Powering India's Cross-Border E-Commerce Revolution

Somduta Singh, Founder & CEO
Assiduus Global

As India accelerates its rise as a global innovation hub, one challenge continues to slow even its strongest brands: the complexity of cross-border e-commerce. Regulations, fragmented marketplaces, and logistics inefficiencies have long made global expansion difficult and costly. Assiduus Global was built to change that.

Founded in 2018 by serial entrepreneur Somduta Singh, Assiduus Global has emerged as a pioneering force in digital distribution. The company has generated over USD 1 billion in revenue for brands, enables 150+ leading brands, and operates across more than 20 countries, including India, US, Canada, UAE, UK, and more.

Global expansion breaks down because the e-commerce stack is fragmented. Product listings, marketplace operations, compliance, inventory movement, and delivery are managed through separate tools and partners, with no shared view of ground reality. Assiduus was built as a unified technology and execution layer. Offering the entire end-to-end e-commerce solution, supporting brands through the lifecycle from listing to last-mile delivery, bringing data and operations together in one seamless system. This gives brands clear control and visibility across markets, turning complex expansion into structured, data-driven growth.

This is powered by Assiduus's proprietary technology stack, which combines Brand Central™, a patent-pending AI-enabled intelligence platform, with full-stack operational infrastructure. Brand Central™ consolidates real-time analytics on product performance, inventory, advertising, and pricing across platforms like Amazon, Walmart, Noon, Flipkart, Shopify, and more. Its AI/ML models deliver demand forecasting, customer behavior insights, inventory planning, and pricing optimization.

Meanwhile, Assiduus's backend systems handle marketplace onboarding, compliance, fulfillment, and brand protection, creating end-to-end automation. What once required multiple teams and tools is now an integrated ecosystem that helps brands scale, reduce risk, and improve profitability.

This trust is reflected in 100% enterprise client retention across FMCG, wellness, beauty, and pharma product categories. Industry recognition has followed, including FT Americas' Fastest-Growing Companies 2025, Deloitte Technology Fast 50 India, Deloitte Technology Fast 500 North America, and Forbes DGems 200.

As India enters a new era of brand expansion, Assiduus is the accelerator powering e-commerce at every scale, from local to international markets. Building a modern Silk Route for e-commerce that drives brand growth across India and around the world.

FOUNDER SPOTLIGHT

Somduta Singh is one of India's most influential women entrepreneurs and a defining voice in global digital commerce. An MIT alumna currently attending Harvard Business School's OPM (2026), she started her entrepreneurial journey at 16, had a multi-million dollar exit at 25, and has built three high-growth ventures.

Under her leadership, Assiduus Global has achieved 100% enterprise client retention. A prolific angel investor with over seventy investments, she is engaged in philanthropy focused on education, women's economic independence, and early-stage founder support.

She has been honoured among Fortune India's Most Powerful Women, Times 40 Under 40, Entrepreneur India's AI Woman Entrepreneur of the Year - Ecommerce and is a recipient of the Champions of Change Award. A best-selling author, trained classical singer, and advocate for women's entrepreneurship, she embodies the ambition to build India's first billion-dollar global e-commerce infrastructure company.
