

TWO YEARS OF BHAJANLAL SHARMA: Delivering Relief, Prosperity and Progress across Rajasthan

In the short span of two years under Chief Minister Bhajanlal Sharma, unprecedented efforts have been made in the direction of development. New milestones and new dimensions have been established. It has benefitted especially the farmers, women, labourers and the youth. A long chain of initiatives is visible from agriculture to irrigation, from new recruitments to opportunities of self-employment and from the Lakhpati Didi to women's self-reliance.

BHAJANLAL SHARMA BECOMES RAJASTHAN'S LIFELINE

Rajasthan Prepares for a Water-Ready Future

Chief Minister Bhajanlal Sharma has spared no effort in quenching the thirst of eastern Rajasthan. The Ramjal Setu Link Project (revised Parvati–Kalisindh–Chambal Project), undertaken with the support and guidance of Prime Minister Narendra Modi, is the biggest example of this. It will provide irrigation to 4-lakh hectares of land and drinking water to more than 3 crore people across 17 districts of eastern Rajasthan. An agreement has also been reached with Haryana regarding the distribution of Yamuna water, with the Government of India being a part of it.

The day is not far off when the waters of the Yamuna River in Rajasthan's Shekhawati region will multiply agricultural yields and every home will have access to clean drinking water.

Under the Jal Jeevan Mission, nearly ₹ 10,482 crore has been spent and about 13.59 lakh rural families have already started receiving tap water. More than 14,025 water conservation works have been completed with the support of Pravasi Rajasthanis in the 'Karmabhoomi se Matrabhoomi Abhiyan (From Workplace to Motherland campaign), along with construction of 3,720 tube wells, installation of 6,317 new hand pumps and repairing of 4.35 lakh defunct hand pumps was done. Initiatives were taken up for works of water conservation under Jal Sanchay Jan Bhagidhari.

ENERGY MISSION OF THE ENERGETIC CHIEF MINISTER

Rajasthan Rises as India's Solar Capital

Nowadays, a country's economic strength is often measured by its energy generation and consumption. In this direction, rapid progress has been made in electricity over the past two years and power generation has been increased by 28 percent (6,839 MW). Rajasthan is on number one position in the country in solar and renewable energy generation. 333 sub stations of 33KV have been set up. 9.19 lakh new domestic connections
