CLEARED FOR TAKEOFF: SCALING INDIA'S AIR INFRASTRUCTURE

SAMIR KUMAR SINHA
Secretary, Ministry of Civil Aviation

"From 74 airports in 2014 to a projected 400 by 2047, we are not just expanding infrastructure, we are redrawing India's connectivity map"

"**Aviation is not merely an economic multiplier. It is a strategic asset. India must evolve into a global aviation manufacturing and services hub**"

TECHNOLOGY PLUS: GIVING AI, DIGITAL BOOST TO INDIA'S CONNECTIVITY

ABHISHEK SINGH, *Additional Secretary, Ministry of Electronics & Information Technology, and CEO, IndiaAI Mission*

"**India's current data centre capacity is around 1GW. If you want to transfer AI workloads from around the world here, we have to augment it multifold**"

"The pace at which decisions are being taken, whether in the Quantum Mission or AI Mission or Research, Development and Innovation scheme, is much faster than what it used to be. The fruits of that will be borne very soon"

MODERNISING INDIA'S PORTS AND MARITIME LOGISTICS FOR GLOBAL CHALLENGES

MADHAIYAAN ANGAMUTHU, *Chairperson, Mumbai Port Authority and Visakhapatnam Port Authority*

"**India doesn't suffer from a shortage of ports or capacity. The Sagarmala project has plugged critical gaps. The shift to 'One Nation, One Port Process' and the new Major Port Authority framework is about unlocking efficiency, not just adding infrastructure**"

"Dredging is essential to maritime infrastructure maintenance. While dredged material was traditionally dumped at sea, we are now examining processes for its reuse. The future of this activity will be environmentally responsible and sustainable"
