

"We are moving from a reactive to a collaborative approach. By bringing together renewable developers and transmission planners every month, we're giving both sides complete visibility and accountability"

GHANSHYAM PRASAD
Chairperson, Central Electricity Authority

"The time has come to let the market decide what's most economical. Whether power is generated within a state, from rooftops, or wheeled in from Rajasthan, decisions should be guided by cost efficiency, not subsidies or artificial advantages"

ALOK KUMAR
Former Secretary, Ministry of Power

"Renewables are being commissioned faster than transmission lines can keep up. The sector needs long-term visibility so that developers, financiers, and manufacturers can plan ahead"

ARUN SHARMA
CEO, Resonia

FINANCE & INVESTMENT: UNLOCKING CAPITAL FOR INDIA'S INFRASTRUCTURE

"Public private partnerships developed only in 2005-06. While we built capacities on one side, the other side needed financing, which had only commercial banks available"

P. R. JAISHANKAR
Former Managing Director, India Infrastructure Finance Company Limited

"Infrastructure should become more heterogenous. Airports and roads are mature asset classes. But many other classes are coming up. The frameworks around them are important"

MOHAMMAD ATHAR
Partner, PwC India

"Shipping has been declared an infrastructure sector. That was a long-standing demand. They will now have access to lower interest rates. It's a huge game-changer"

T.K. RAMACHANDRAN
Former Secretary, Ministry of Ports
