SUSTAINED FINANCIAL EMPOWERMENT: THE SYNERGY OF PM & CM KISAN NIDHI

Direct Benefit Transfer (DBT) has emerged as a game-changer in doubling farmers' income.

- **₹12,000 Annual Support:** Through seamless coordination of PM Kisan Samman Nidhi and CM Kisan Samman Nidhi (₹5501 Cr), every eligible farmer now receives ₹12,000 annually—crucial liquidity for small-scale farmers to secure seeds and fertilizers without debt.
- **Atal Krishi Jyoti & Power Subsidies:** To keep input costs low, the government has provisioned ₹13,914 crore for agricultural power subsidies, ensuring affordable and uninterrupted electricity.

ENERGY SECURITY: THE 'SOLAR FRIENDLY' MOVEMENT

The farmer, once Annadata, is now evolving into Urjadata (energy provider). Under the PM Krushak Mitra Surya Yojana (₹343 Cr), solar energy is being integrated into farming. Solar pumps reduce dependence on the grid, lower irrigation costs, and promote sustainability.

4. Animal Husbandry & Dairy: Pillars of Supplementary Income

Agriculture becomes truly profitable when integrated with animal husbandry.

- **Milk Production Bonus:** A per-litre bonus is being introduced for milk producers. The Dr. Bhimrao Ambedkar Kamdhenu Yojana offers grants up to ₹10 lakh for rearing 25 cows.

- **Strengthening Gaushalas:** Grants for cow shelters have doubled from ₹20 to ₹40 per cow, ensuring better conservation and a steady supply of organic manure.

TECHNOLOGY & RESEARCH: STEPPING INTO MODERN AGRICULTURE

Bridging the gap between laboratory and field is a top priority.

- **High-Quality Research:** Specialized grants of ₹158 crore for Jawaharlal Nehru Agricultural University (Jabalpur) and Rajmata Vijayaraje Scindia Agricultural University (Gwalior) will accelerate innovation in seed quality and crop resilience.
- **Digital Crop Survey & Mechanization:** With ₹243 crore allocated, modern equipment is being subsidized. Digital crop surveys ensure precise monitoring and transparency, enabling swift insurance claims under PM Fasal Bima Yojana (₹1299 Cr).

REGIONAL DEVELOPMENT: THE DATIA PARADIGM

Recent projects in Seondha (Datia) serve as a blueprint for correcting regional imbalances. Once synonymous with water scarcity, Datia is now emerging as a leader in irrigation. Pipe-based water supply and the Ken-Betwa link are steering the region toward Agri-based Industries.

GOVERNANCE WITH EMPATHY: HONORING THE FARMER

The administration operates on the principle that the soldier at the border and the farmer in the field deserve equal reverence.

- **Natural Farming & Millets:** Through the National Mission on Natural Farming (₹142 Cr), farmers are incentivized to reduce chemical use and protect soil health. Promotion of Shree Anna (Millets) is central to this nutritional and ecological journey.
- **Streamlined Market Networks:** Farmer Producer Organizations (FPOs) and the CM Krishi Unnati Yojana are being prioritized to ensure farmers receive fair prices in a seamless market environment.

THE ROAD TO A DEVELOPED MADHYA PRADESH

The Year of Farmer Welfare–2026 is a well-calibrated strategy to establish Madhya Pradesh as India's ultimate Food Basket. With over ₹3000 crore for irrigation, ₹12,000 annual direct support, and mainstreaming of animal husbandry, the state is taking revolutionary steps.

Under the chief Minister Dr. Yadav's leadership, Madhya Pradesh is not only marching toward the 100-lakh hectare irrigation target but also fulfilling the promise of a Prosperous Farmer, Prosperous State. When fields are green and farmers' pockets are full, the economy thrives—and the glory of Madhya Pradesh shines on the global stage. This is a resolve to turn the sweat of the Annadata into the gold of prosperity.
