AI & ROBOTICS: Meet the Future: The Rise of the Humanoids

THE INDIAN ROBOT

KEY TAKEAWAYS

- India is strong on software but has some catching up to do in robotics hardware, compared to US, China
- The goal is to use robots to inspire students and drive innovation within India's education system. Robotics could be a core language of learning in the future

I am confident Indian robots will take over the world within 3-5 years. And we'll make them probably at a fourth of the cost

Innovation will be the next big language of education. And that is where companies like ours will play a very significant role

RAHUL SHAH

Managing Director, Bidyut Innovation
