AIRPOCALY

WHY DELHI HAS FAILED AND WHAT N

By **AVISHEK G. DASTIDAR**

345
AQI
The average for November 2025, compared to 224 in October

23
days
The longest streak since 2019 of very poor (300+) AQI days in Delhi

8.2
years
Life expectancy Delhiites stand to lose courtesy pollution

THE AIR QUALITY INDEX (AQI) METER

GOOD	SATISFACTORY	MODERATE	POOR	VERY POOR	SEVERE
0-50	50-100	100-200	200-300	300-400	>400

AQI measures eight major air pollutants: PM10, PM2.5, Nitrogen Dioxide, Sulphur Dioxide, Carbon Monoxide, Ozone, Ammonia and Lead; Sources: CPCB; Energy Policy Institute, University of Chicago
