A key component of this is the school's longstanding case-teaching methodology, which requires faculty to engage closely with industry. "To write cases, you have to be going to the industry, understanding what they are doing, extracting critical business scenarios," the director explains. This regular dialogue does more than enrich teaching material: it allows faculty to spot early trends, understand organisational shifts and translate those insights for the classroom. As a result, students encounter not only theoretical frameworks but also the latest developments shaping corporate decision-making. IIM-A also has 10-plus research centres through which faculty and doctorate students connect extensively with diverse industry and public sector organisations.

Curriculum renewal is another structured element of

## TOP 10 GOVERNMENT B-SCHOOLS WITH BEST VALUE FOR MONEY

## ALUMNISPEAK

**SANJEEV BIKHCHANDANI**
BATCH OF 1989; VICE-CHAIRMAN, INFO EDGE INDIA LTD; CO-FOUNDER, ASHOKA UNIVERSITY

I spent two years at IIM Ahmedabad studying for a postgraduate diploma in management. During this time, you gain knowledge, contextual understanding and core concepts in business and management. You also sharpen your skills—quantitative, analytical and written and oral communication. And your classmates and seniors and juniors go on to become a very useful and powerful professional network. You develop a professional and a goal-oriented attitude. Altogether, it added significant value because I came away with all of this. The workload was high and the programme was rigorous. We were trained to work hard and process large volumes of information quickly—daily readings sometimes ran into a few hundred pages. Pushing through that builds speed of thought and you develop the ability to distinguish between what is important and what is less so and prioritise appropriately. You develop a structured way of thinking, and a strong work ethic—all major takeaways for me. And finally you make great friends with your batchmates.

Because I had worked for three years in advertising before I went to IIM-A, I was able to gain a lot more from the programme as I could relate a lot of what was being taught in the class to the real world. If you are considering studying management, I would recommend working for a few years in the industry before doing an MBA.
