

The PCR test, used to identify infections, is a real test, but its inventor said, **don't use it at too high a cycle threshold** or it will generate false positives

**Bill Gates was a major investor in the mRNA injection. They were flowing millions of dollars into previously very respected news outlets to, quote unquote, overcome vaccine hesitancy**

**Millions of dollars went to professional organisations representing doctors, obstetricians, gynaecologists and, paediatricians, to make sure doctors in their organisations didn't go off script**

You don't **crowd people into households, multi-generational households**, lock them in, depress their immune systems by closing off beaches and playgrounds as we did in the US and western Europe
