A HEALTHY FIGHT AGAINST WRINKLES

RAJWANT RAWAT

Even before you get into a physical activity, **you need to understand how your body behaves** and evaluate yourself. You must start with a moderate regime of walking and running...and gradually change this pattern

- Dr Sunil Dagar
COO, Fitness enthusiast and Marathoner

You should not only have a good diet, you should also keep your mind full of good thoughts too, **for a good mind can create a good body.** Youthful living is not just about exercise but your emotional health as well

- Dr Upasana Arora
MD & CEO, Yashoda Medicity

Sudden cardiac deaths **are not that subtle and sudden,** they give some indication. You can't get out of a treadmill and go for weights. Routine things can be done to keep fit, even with pollution all around

- Dr Amit Sharma
Senior Consultant, Orthopaedics, Joint Replacement & Arthroscopy

There will always be challenges and curveballs, **but we have to actively make a decision** that today, no matter what, I'm going to be happy and make time to exercise. I think discipline is what's needed when we run out of motivation

- Gul Panag
Actress

Fasting de-sensitises cells to excessive insulin. It is important because frequent **snacking leads our cells into being insulin-resistant,** leading to more insulin being released. This leads to ageing

- Dr Gagan Saini
Senior Radiation Oncologist
