A MORE COMPLETE YOU FOR A BRIGHTER TOMORROW

BEYOND CLASSROOMS

Building Leaders Who Are Ready for Life

The world is changing faster than ever. Technology, global opportunities and evolving expectations are reshaping the future of work and life. In this dynamic environment, education cannot be limited to classrooms, examinations and placements. It must prepare young people for life.

At GIBS, we believe true education develops not only professional competence, but also character, clarity, confidence and a sense of purpose. This belief lead to the creation of GIBS Mindvalley — a 10-acre lush green campus in Bengaluru, designed to nurture the complete well-being of every student.

The GIBS MindValley Program (MVP)

FOR PGDM | MBA | BBA STUDENTS

The Mindvalley Program (MVP) is a unique student-development experience that goes beyond academics. It creates an ecosystem where students are encouraged to discover themselves, build healthier lifestyles, explore creativity, develop leadership abilities, form meaningful relationships and live with purpose.

Through sports, fitness, yoga, meditation, arts, cultural activities, leadership experiences, community initiatives and much more. MVP helps students learn, grow and become the best version of themselves.

All our programmes — PGDM, MBA and BBA — benefit from the MindValley experience because we believe holistic development is essential for every student, regardless of their chosen domain.

RITESH GOYAL
Founder & Managing Director
GIBS Business School

Our aspiration is to nurture successful professionals and responsible human beings who make a positive difference to the world. The Mindvalley experience is not just about what students learn, but who they become — and that, for us, is the true measure of education.

At GIBS, we remain committed to creating an environment where students can learn more, live better and lead with purpose.

> *Education should prepare a student not only for a successful career but for a meaningful, balanced, and purposeful life.*
