113. A shares are denominated in RMB and were restricted to domestic investors until 2002. B shares are listed in foreign currency (e.g., in U.S. dollars on the Shanghai exchange) for trading primarily by foreign investors.

114. According to MSCI, at its launch in 1988, there were only ten countries in the MSCI Emerging Markets index, representing less than 1 percent of world market capitalization. Since then, the index has evolved to cover more than 800 securities across twenty-three emerging markets and represents approximately 11 percent of world market capitalization. The BRICs represent 42 percent of the MSCI Emerging Markets index. "MSCI Emerging Markets," https://www.msci.com/emerging-markets.
