69. Abdelal challenges “the argument linking U.S. hegemony to the emergence of a liberal international financial system,” tracing the norm of capital mobility to European rule-makers within the EU and the Organisation of Economic Cooperation and Development (OECD), not a “Wall Street-Treasury Complex,” which was largely a “passive beneficiary” of the regime. Abdelal, *Capital Rules*, 25. But contrast this with Kirshner, *American Power After the Financial Crisis*, especially 56–58 and 62–66.
