59. The economic locomotive power of the Chinese economy for the rest of the world during the post–global financial crisis years is also clearly demonstrated by how China's economic slowdown in the last few years has affected the global economy in terms of commodity prices and equity markets.

60. On Chinese aid to Africa, see Deborah Brautigam, *The Dragon's Gift: The Real Story of China in Africa* (New York: Oxford University Press, 2009).

61. An anonymous Chinese financial expert emphasized the importance of diversifying China's investment around the world and in different institutions. Interview, November 2015.

62. China's foreign exchange reserves reached $1 trillion in late 2006 and expanded rapidly to reach $3 trillion in 2011. Despite some decline in reserves in the aftermath of China's economic downturn in the summer of 2015, the level of reserves is still above $3 trillion at the end of 2015. Data, People's Bank of China (PBOC).

63. Miller notes that with such vast financial resources, China is now experimenting with the best way to use them. Ken Miller, "Coping with China's Financial Power," *Foreign Affairs* 89, no. 4 (2010): 96–109.
