

WHAT IS ADULT ADHD?

A neurodevelopmental condition that affects attention, impulse control and executive function. It impacts how a person focuses, plans, organises and completes tasks.

SYMPTOMS OF ADULT ADHD

- **INATTENTION:** Long history of forgetfulness, unfinished tasks, losing things
- **IMPULSIVITY:** Hasty decisions, low patience
- **DISORGANISATION:** Procrastination, last-minute work patterns, missed deadlines
- **EMOTIONAL DYSREGULATION:** Mood swings, getting overwhelmed
