SMART STATES: HARYANA MODEL FOR GLOBAL PARTNERSHIP

"I have not come here simply to talk about investment. I have come here to talk about trust. A trust that has been built over the last four decades between Haryana and Japan"

"Countries and states are no longer competing only on incentives. The competition is now about speed, resilience and partnerships"

"For us, a Smart State is one that understands the future in advance, one that listens to investors' concerns before problems arise"

"We are moving from ease to speed, and from speed to predictability. Because investors do not want only approvals—they want certainty"

NAYAB SINGH SAINI
Chief Minister, Haryana
