For nearly two centuries, The Macallan has defined single malt Scotch whisky through its uncompromising focus on wood and spirit. Today, that legacy takes on a new visual form. The brand's Double Cask, Sherry Oak and Colour Collections have been reimagined with a distinctive design language by acclaimed designer David Carson,now unveiled in India.

Beyond a visual redesign, this new identity reframes the pillars that define The Macallan: craft, heritage and innovation.

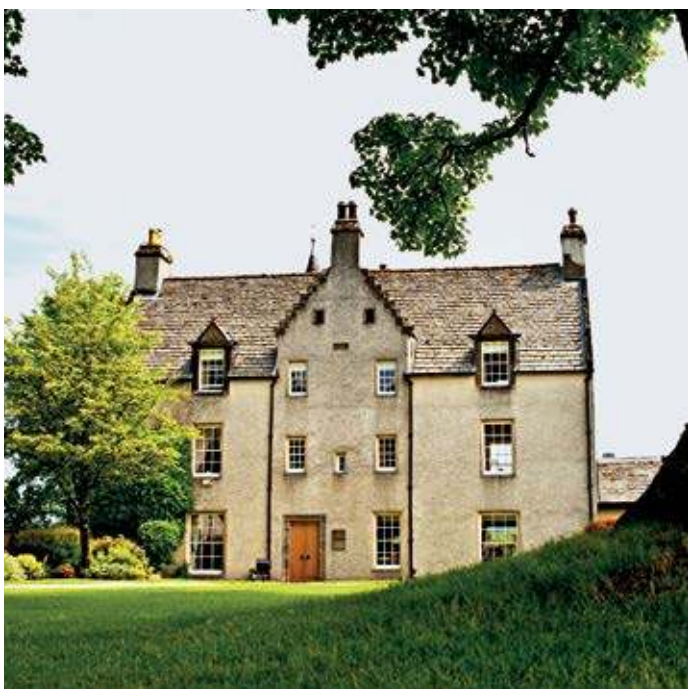

SPIRITS
THE MACALLAN

Carson's design draws from the interplay between sherry-seasoned oak and whisky, at the core of The Macallan's character. The bottle form echoes the sweeping green roof of The Macallan Distillery in Speyside, while the triangular shoulder label references Spain's Sherry Triangle, the Andalusian region known for producing the sherry that seasons the Macallan's oak casks that in turn shape the whisky's flavour and natural colour. A refined cask icon system on the rear label offers a more intuitive way to navigate flavour profiles.

Subtle yet considered details extend to functionality. A discreet QR code and enhanced anti-counterfeit features introduce an added layer of traceability, reinforcing authenticity without interrupting the design language.

While the aesthetic evolves, the whisky remains unchanged, retaining its depth, balance and signature character.

"Like whisky, design is about balance," says Carson. "With The Macallan, the intention was

to create a visual identity that honours its heritage while reflecting its forward momentum. Every detail is a tribute to the mastery behind each dram."

Each collection continues to express a distinct facet of The Macallan's approach to oak and maturation. The Double Cask collection brings together sherry seasoned American and European oak to create a profile marked by soft spice, baked fruit and warm toffee. Sherry Oak collection, matured predominantly in sherry seasoned European oak casks, delivers a richer, deeper expression with notes of dried fruit and spice.

To mark its India unveiling, The Macallan hosted immersive, education-led experiences in New Delhi and Mumbai, bringing its craftsmanship to life through sensory, engaging formats. Guests were guided through curated walkthroughs and installations designed to unpack the role of oak, sherry seasoning and time in shaping the final spirit.

In Mumbai, the experience culminated in an exclusive tasting led by Euan Kennedy, Lead Whisky Maker at The Macallan, who offered deeper insight into the brand's approach to maturation and balance.

"While the design evolves, the whisky remains true to its character," Kennedy notes. "Our focus continues to be exceptional oak casks and sherry seasoning, elements that define the depth and elegance associated with The Macallan."

As India's luxury consumer base continues to evolve, the country remains a key market for The Macallan. The reimagined Timeless Collections signal a focused approach to engaging this audience, one that values provenance, craftsmanship and a deeper connection to what lies within the glass.
