

The ICFAI Group

Pioneering professional education for over 4 decades

ICFAI was established in 1984 as a not-for-profit society with the broad objective of empowering students through world-class quality education. The Institute announced its arrival on the Indian education arena by launching a highly advanced, innovative professional program in financial analysis in the year 1985. The Program was first-of-its-kind in India, aimed at equipping students and working professionals with cutting-edge knowledge in contemporary areas of finance. Since its establishment, the ICFAI Group has made a significant mark in the Indian educational field with a pan-Indian network and presence.

Innovation has been the hallmark of the ICFAI Group and its culture ever since it embarked on the journey to transform the higher education landscape in India with the introduction of a number of world-class courses. A turning point came in 1995, when in a leap of faith, the ICFAI Group decided to enter the field of management education with the launch of a chain of business schools (under the umbrella brand IBS) across India in 1995 to offer management program. Since its inception, IBS has been consistently ranked among the top ranked B-Schools of India, providing excellent academic delivery and infrastructure to its students and transforming them into leaders for the future.

Another example that is a testimony to the culture of innovation is the introduction of Case Study-based teaching methodology at IBS. The Case Research Center at IBS has become a center of excellence and has won several accolades across the world.

The ICFAI Group has 2 Strategic Institutional Units, the ICFAI Universities and the ICFAI Business Schools. In all the programs offered across these units, the emphasis is on adherence to academic rigor and differentiated curriculum with the aim to bridge the industry-academia gap.

At the ICFAI Group, the focus is on student-centered learning, rather than the conventional teacher centered approach to instruction.

Besides, the institute is also engaged in research activities covering areas such as environmental sustainability, agricultural economics, health policy, financial economics, banking, intellectual property rights, etc. There have been numerous path breaking research and good quality publications in these areas. We also take pride in the fact that flexible and tech enabled learning plays an important role in ICFAI's teaching methodology.

The delivery takes place with the use of hi-tech learning management system at campus programs and content delivery for distance learning through online medium.

The ICFAI Group practices the value of academic integrity at all levels. As a policy, admissions are purely merit based and there is nothing like capitation fee or donation. The fee payable is published in the application material and that remains unchanged.

The ICFAI Group's culture of teaching and learning supports and fosters intellectual and personality development among its graduating students. They carry an attitude of ownership of their work. The ICFAI Group strives to make the students - DOERS. The programs are designed in such a way that the students and professionals graduating from the institution have the ability to take risks, make decisions and own the work. The ICFAI Group system, strongly believes in developing an 'entrepreneurial mindset' among its graduating students.

At ICFAI, students are encouraged to develop research and analytical attitude, thanks to our institutional strength and support for the research and development activities. Holistically, the student undergoes a transformative change. The alumni of the ICFAI Group are working in renowned companies worldwide. Collectively, the ICFAI Group alumni contribute significantly to the growth story of India.
