HOSPITAL DEMAND

Even a modest admission rate translates into a very large annual patient load nationwide

Hospitalisation cases per 100 persons, excluding childbirth, in previous 365 days (2025)

41 mn*

Estimated annual hospitalisations across India

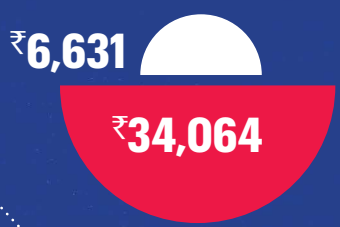

**Calculated on the basis of population estimates and survey findings*

COST FACTOR

Hospitalisation expenses remain high, but public hospitals provide a significant cost cushion

Average out-of-pocket medical expenditure per hospitalisation (2025)

■ Public hospitals ■ Overall

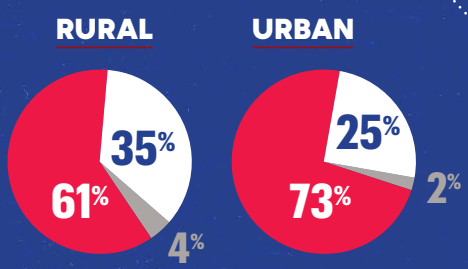

PRIVATE TILT

Those seeking outpatient care continue to favour private providers over public facilities

Health facility used for medical advice in previous 15 days (2025)

■ Public ■ Private ■ Informal

Note: *The NSS 80th round was conducted from Jan. 1–Dec. 31, 2025, and covered 139,732 households, including 76,296 in rural areas and 63,436 in urban; the 2018 data is from the NSS 75th round (July 2017–June 2018)*
