

Ferrari 849 Testarossa

Ferrari has brought the brand-new 849 Testarossa to our shores. The flagship Ferrari is the replacement for the SF90 Stradale, and uses a re-engineered mid-rear twin-turbo V8 setup combined with three electric motors, with a total output sitting at a staggering 1,050bhp. The design is a mix of retro and modern, with L-shaped headlamps connected by a black strip, while the rear features a twin-tail design as well as an active rear spoiler, derived from motorsport. The cabin is driver-focussed with a 16-inch driver's display that facilitates smartphone integration. The 849 also lets go of the haptic steering controls, using physical knobs instead. Being a hybrid, the Testarossa can drive on electric power alone for up to 25km, while performance figures are headlined by a 0 to 100kmph time of just 2.25 seconds, and a top speed of 330kmph.
