

TECH THESE OUT

While the soul of his bakery is a massive, 10-tray oven (the best corner for its warmth and fragrance), Montay's engineer heart beats for high-tech gadgets. He is currently experimenting with a Martello Spinner, an electric turntable for avant-garde piping.

Montay's final advice for any kitchen is to prioritise accuracy and visibility over clutter. He advocates for a kitchen built on cleanliness and the total elimination of hidden storage. "Accuracy, quality and consistency are key, everything else is just noise," says the chef.

"I TAKE A LOT OF CARE AND ATTENTION TO THE INGREDIENT'S QUALITY, THEIR SOURCING, THE FRESHNESS OF THE PREPARATIONS AND THE CLEAN PLATING, SO THAT AT THE END, OUR GUESTS RECEIVE AN EXPERIENCE OF FRENCH FINESSE AND FLAVOUR DRIVEN PLATES."

— CHEF MAXIME MONTAY
