

Furniture Fiesta

The Great Eastern Home is expanding the possibilities of furniture design with its latest collection of handcrafted ceramic furniture, bringing together the enduring beauty of ceramic with the warmth and strength of wood. Developed at its in-house Ceramic Workshop, the collection reflects the brand's commitment to artisanal craftsmanship, with every piece shaped, glazed, fired and hand-finished by skilled artisans. From statement centre tables to distinctive accent pieces, the collection explores innovative techniques that give ceramic the strength and structure required for furniture. This new endeavour blends traditional craftsmanship with contemporary design, creating distinctive pieces that celebrate material, artistry and functionality.

Seriousness, Begone

Interiors just got a serious dose of humour, thanks to Resyde Decor. With new showrooms in Delhi and Mumbai (and an online store), this destination is rewriting the Indian design story with a healthy disregard for playing it safe. Leading the charge is iconic German brand KARE, bringing over four decades of surrealism, wit and a literal wild menagerie to your living room. Expect tray-holding gorillas, monkey bookends and lamps modelled after the human form. If you are ready for fewer rules and a lot more personality, it is time to loosen up and let the wild things in.
