Bold Surfaces, Beautiful Spaces

Pidilite Professional Solutions empowers architects and designers to craft distinctive, enduring luxurious environments

Bureau Report

As homes come alive with the warmth and sparkle of the festive season, every detail becomes a reflection of personal style. To help design visionaries elevate these spaces, Pidilite Professional Solutions brings together world-class offerings that serve as the foundation of enduring beauty. By seamlessly blending aesthetics, innovation and performance, these advanced solutions empower architects and interior designers to craft elegant homes where sophistication resides in every single surface.

Fine Artistry

True luxury is defined by surfaces that tell a story of refinement. ICA, Pidilite's range of premium Italian wood finishes, combines traditional craftsmanship with sustainable formulas that enhance the natural beauty of wood while minimising environmental impact.

- Creativa offers special effects that mimic marble and metal.
- S-Matt delivers a velvety, ultra-matte finish.
- Acquabella provides eco-conscious, water-based finishes in a versatile range of clears and colours.

Tailored for wood, veneer, plywood, metal and MDF, ICA lives up to its promise: "Good taste shows." Furthermore, in partnership with Elekta, Italy, ICA Pidilite has expanded its portfolio to a new world of premium Italian wall finishes.

Modern Canvas

Floors are no longer just a functional necessity; they are a canvas for character. Dr. Cipy offers technology-driven, sustainable flooring solutions that serve as premium alternatives to mass-produced materials. With over 45 years of experience in the Indian market, the brand customises its bespoke offerings—including PU concrete, cementitious terrazzo and epoxy terrazzo—to inject personality into commercial, residential and institutional spaces. Boasting a dynamic colour palette, striking patterns and versatile textures, Dr. Cipy provides complete creative freedom without compromising on durability, low maintenance and easy movement.

Flawless Details

True sophistication lies in perfecting the details. Roff Starlike, Pidilite's tile and stone fixing expert, is a two-component epoxy grout crafted to fill the "lines that matter". Featuring patented quartz technology, it offers exceptional UV resistance for all-weather outdoor use, while its waterproof nature makes it ideal for bathrooms, pools and terraces. Available in 24 shades across the Classic, Crystal (Translucent) and Metallic collections, its advanced Italian technology guarantees shade longevity, stain resistance and chemical resistance.

Clearly, Pidilite Professional Solutions transforms design visions into homes that are as distinctive as they are enduring.
