2047, A CAPITAL MAKEOVER

The Master Plan for Delhi-2047 envisages shifting all density to a new arc of urbanity—an Outer, Outer Ring Road on the west called UER-II

By **Avishek G. Dastidar**

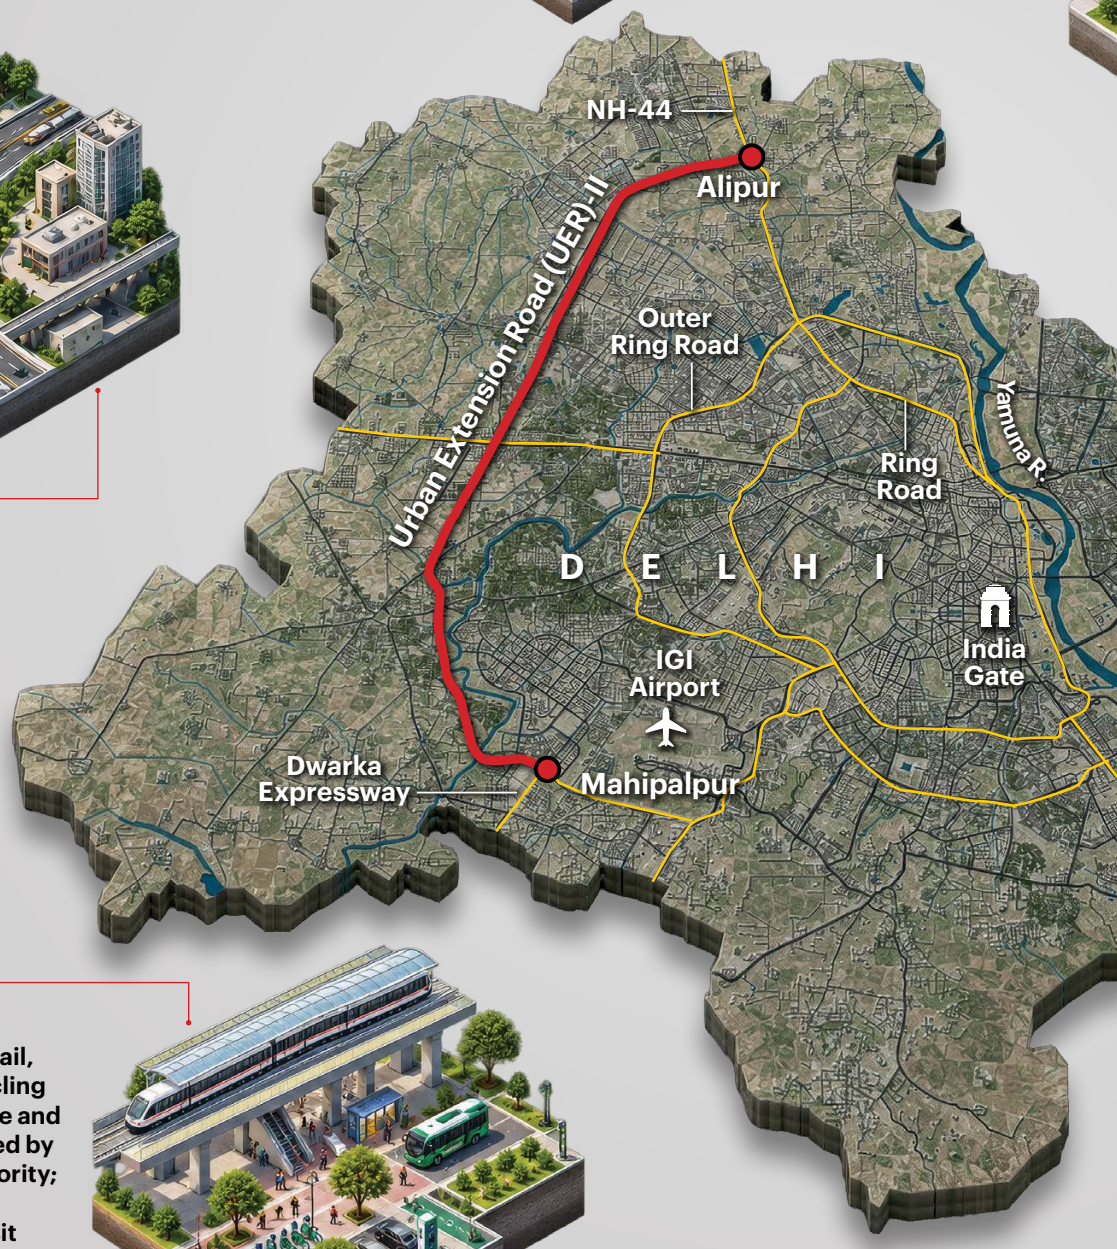

NEW OUTER HUB

Urban Extension Road-II (UER-II)—a six-laned, 75-km orbital road—to anchor a new outer hub, with a 250-metre corridor on either side planned as a high-density, mixed-use zone bringing homes closer to jobs, markets and schools

HOUSING AND SOCIAL INFRASTRUCTURE

A broader housing mix across income groups, with 20 per cent reserved for affordable housing; regeneration of ageing areas and expanded essential facilities in dense neighbourhoods

EFFICIENT, LOW-CARBON MOBILITY

A shift towards metro rail, buses, walking and cycling through better last-mile and intermodal links, backed by a single transport authority; congestion pricing proposed around transit hubs, the Walled City and the commercial core
