SELF-RELIANCE IN DEFENCE MANUFACTURING

"We were talking about the ground, now we are talking about UAVs and are heading into space. In future warfare, most of the controls are going to come from the space segment itself"

SAMEER JOSHI
CEO and Director, NewSpace Research & Technologies

"In Operation Sindoor, many drones came across the border and we countered them. This could increase tenfold. The enemy is getting smarter"

BUILDING INDIA'S NEXT GENERATION OF DEFENCE STARTUPS

G. SATHEESH REDDY
Member, NSAB; Advisor to Government of Andhra Pradesh

"Defence and aerospace startups are transforming India's military manufacturing ecosystem by developing core military technologies as well as complete systems"

"We can't be content with past successes. We must work on the most advanced, first-of-their-kind systems to maintain the element of surprise in any future conflict"

THE GROWTH CHALLENGE: TURNING HUMAN DEVELOPMENT INTO JOBS, INVESTMENT AND ECONOMIC MOMENTUM

K.M. CHANDRASEKHAR
Vice-Chairperson, Kerala State Planning Board; Former Union Cabinet Secretary

"We should bring down the debt. It would be good for the Government of India to sit with states that are in real trouble, like Kerala, and see how, over a period of time, we can bring them back to shape"

"The biggest problem Kerala needs to tackle is its 28% unemployment. Our goal would be to halve that rate within the next five years"
