

4

Open up the room Reconsider furniture placement before buying anything new. Maintaining clear sightlines and choosing furniture with lighter profiles or elevated legs creates a greater sense of openness, especially when entertaining guests.

5

Design the entry with intention An entryway should be purposeful rather than oversized. A thoughtfully designed combination of a bench, key tray, concealed storage and a simple hook creates an organised arrival experience and establishes the tone of the home.

6

Refresh the material details Small architectural details often have the greatest visual impact during festive celebrations. Polishing brass hardware, restoring metal trims and refreshing timber finishes helps the home feel cared for without significant intervention.

7

Introduce texture before colour Seasonal updates don't always require a new colour palette. Natural textures—woven textiles, fluted timber, linen, travertine or brushed leather, add warmth and depth while allowing festive accents to remain understated.
