Reimagine existing furniture Sometimes the most effective refresh is simply repositioning what already exists. A lounge chair, accent seat or side table can become a new focal point by creating a more intentional conversation setting within the living room.

9

Let the dining table breathe A restrained tablescape is often the most elegant. One runner, a single centrepiece and honest natural materials such as stone, wood or metal allow the setting to feel timeless rather than ornamental.

The most enduring homes are not redesigned every season, they are thoughtfully composed over time. Diwali offers an opportunity to rediscover the spaces we already inhabit, revealing their warmth through light, materiality and careful editing rather than excess decoration. A truly welcoming festive home isn't measured by how much you add, but by how well you allow your space to breathe.

Vaibhav Sehgal and Aastha Sehgal are principal designers at House of Albero, a Noida-based furniture and design studio @houseofalbero (Instagram)
